WARNING:
The safety of your ears is in your hands.
Get the most out of your equipment by playing it at a safe level - a level that does not harm your ears. Use the following listening level as a guide. Sound can be damaging. Over time, your hearing "comfort level" shifts loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing shifts.
ESTABLISH A SAFE LEVEL.
• Slowly increase the sound level until you can hear it comfortably and clearly, without distraction.
• Once you have established a comfortable sound level, set the dial and leave it there.
• Do not increase the sound level again until you have heard it clearly, without distraction.
• Use caution to temporarily discontinue use in potentially hazardous situations.
• Headphones, like speakers, can cause hearing damage. The use of headphones may create a safety hazard and is illegal in many areas.

AVERTISSEMENT:
La protection de votre ouïe est entre vos mains.
Obtenez le meilleur de votre équipement en jouant à un niveau sûr - un niveau qui ne nuit pas à votre ouïe. Utilisez le niveau sonore suivant comme guide. Le son peut être dommageable. Au fil du temps, votre niveau sonore "confortable" se déplace vers le haut et devient potentiellement dangereux pour votre audition. Évitez cela en réglant votre équipement à un niveau sûr AVANT que votre audition ne se déplace.
ÉTABLISSEZ UN NIVEAU SÛR.
• Augmentez progressivement le niveau sonore jusqu'à ce que vous puissiez l'entendre confortablement et clairement, sans distraction.
• Une fois que vous avez établi un niveau sonore confortable, réglez le bouton et laissez-le là.
• Ne réglez pas le niveau sonore plus haut jusqu'à ce que vous puissiez l'entendre confortablement et clairement, sans distraction.
• Utilisez avec précaution les écouteurs, car ils peuvent causer des dommages à l'audition. L'utilisation d'écouteurs peut créer un danger de sécurité et est illégale dans de nombreuses régions.
